

Start-up Programme[™]

Programme Summary

The Start-up Programme[™] is an opportunity for early-stage to start a business in the United Kingdom and begin the journey to UK permanent residence.

The UK is one of the world's most advanced countries, ranking 4th in the Global Innovation Index 20 20. It is one of the best countries in the world in which to start a business, with 65 million potential customers, the lowest corporation tax in the G20, low barriers to starting a company, R&D tax relief and a stable government committed to supporting entrepreneurship.

The Start-up visa is one of the lowest-cost schemes of its kind in Europe, with no minimum investment requirement. Visa holders are eligible to switch to the Innovator visa within 2 years. Once on the Innovator visa, holders can achieve UK permanent residence (known within the UK as 'Indefinite Leave to Remain' or 'ILR') in just 3 years, with family members eligible after 5 years.

Applicants may apply as an individual or as a team with another entrepreneur, either starting a company on their own or under partnership with an existing UK company.

Programme Specifications
